They will be presented with the candidates, the positions they are vying for and a brief summary of their policies. After the elections, the system allows students to view results of the elections. This eliminates manual effort used in counting of votes and automatically tallies election results (Anand and Divya, 2012) and visualizes election results. Additionally, the system automatically prevents multiple voting by setting vote status in the database to check if a voter has already voted.

Project Objectives

The main objectives of this project is to design and implement a web application which is able to:

1. encourage participation of a higher number of students in the election process
2. ensure credibility by preventing double voting
3. provide an interface where students can view the policies of candidates

Methods Used

The methods to be used for the project include:

- review of relevant literature
- consulting students
- client side: CSS3,HTML5,JavaScript
- server side: PHP
- database: MySQL

Expected Outcome

The proposed student online voting system would allow students to vote online and ensure that no student can vote multiple times.

Facilities and Resources Needed For This Project

- UMaT library online resource
- Github
- Xamp
- MySQL
- HTML,CSS, PHP and Javascript programming languages
- Visual Studio Code
- Internet
- Laptop

Scope of Work

This project work is designed to enable students vote online. It will use student ID and password and other credentials of user to register students. The project is limited to a voting system of a college or university. The design will cover some authentication and security issues.

Project Organization

This project is categorized into five chapters where Chapter 1 will consist of the problem statement, methods and facilities to used. Chapter 2 will also comprise a review of the relevant literature related to the project topic. Chapter 3 goes on to discuss the methodology and designs used in the project. The implementation details of the project are discussed in Chapter 4. Chapter 5 contains a summary of the findings of the project, the limitations and recommendations.

Design and Implementation of A Student Online Voting System

Asiedu Solomon

October 26, 2019

1 ABSTRACT

The word "Vote" means to express one's preference for a candidate from a list, to elect or to determine. In most current voting systems used by students, voting is performed by using a ballot paper and thumbprint. This is a time consuming process and involves manual effort. It might also lead to the possibility of invalid votes and unfair results due to rigging. The inconveniences in the manual voting process coupled with academic load and time pressures leads to a problem of general apathy of students towards the election process. Students are not willing to wait in long queues and it usually results in a low student turn out for the elections.

This project aims at creating an online application through which the voting process is made easier. In the system, the administrator can add candidates, upload their pictures and policies. The student registers with their unique student numbers, password and email. On email verification, students will be sent a unique voter ID. At the time of voting the student logs-in with the unique voter ID. This prevents impersonation and multiple voting from one student. The students can then view the results of the election.

Agenda Item 4.	<u>Report by the State Superintendent of Education</u>
-------------------	---

State Superintendent of Education John White stated that the final statewide tour to discuss career education efforts and career diploma implementation will begin next week. Past tours have provided two specific lessons: (1) the stigma that is often attached to career education must be removed, and (2) if real economic opportunity is to be offered to students who are not immediately going to a four-year university, we must ensure that the career education that is provided results in credentials that allow them to continue their education and to succeed in the workplace. Specific components of Jump Start will be proposed for public discussion, including 8th graders making the transition to high school; 9th and 10th grade curriculum, 11th and 12th grade curriculum, credentials that students can achieve in that time, rewards that school systems will accrue when students succeed in career education, and how a system of technical preparation can be funded so that students can be employed in Louisiana jobs.

Source of Funds:	Federal

Purpose: These funds provide for the creation of new schools to serve students who currently attend "D" and "F" schools by:

(Motion continues on page 8)

1. encouraging proven school operators to provide new, high-quality educational options for students in low-performing schools, and
2. providing for the training or planning period for high-potential school leaders who intend to lead a school focused on serving this student population.

Basis of Allocation: Funding will come from the federal 1003(a), Public Charter School Program and Race to the Top grants and from 8(g) New Schools Incubation. Recipients of funds submitted competitive Believe and Succeed grant proposals to the LDE and were evaluated using a rubric and determined eligible to receive funds by a review committee.

Management and Finance - Competitive

- 5.2.9 On motion of Mr. Guillot, seconded by Ms. Boffy, the Board approved the following allocation:

Allocation:	Early Childhood Programs: Louisiana Early Education Program (LEEP)
Amount:	\$110,000
Funding Period:	01/01/2014 - 9/30/2014
Source of Funds:	Federal

Purpose: This is year two of a three year grant. The purpose of the Preschool LEEP (Louisiana Early Education Program) Summer Institute is to provide certification and training opportunities for early intervention specialists and/or teachers seeking certification in early intervention. The Early Intervention (EI) certification is required for Louisiana teachers who provide services to children with developmental delays from birth through kindergarten. These EI specialists work very closely with regular education preschool teachers as well as the families to ensure the children with disabilities are provided a free appropriate public education, affording them the opportunity to develop to their fullest potential, and that this education will be provided by qualified individuals. A review of current data indicates a shortage of certified teachers in the field of early intervention/early childhood special education. Currently reported for this school year, there are approximately 574 Early Intervention (EI) teachers across the state and, of that number, there are 168 (29.3%) who are not certified in the field. There is a great need for teachers with certification to teach children with developmental delays from birth through kindergarten especially in our more rural areas. By providing funds to two university applicants, more teachers can acquire the courses required to be Early Intervention certified.

(Motion continues on page 9)

Basis of Allocation: This allocation for year two of the LEEP grant was chosen by a Competitive Request for Applications (RFAs) in FY 2012. The grant is being allocated to Southeastern Louisiana State University. This university will work with the University of Louisiana-Monroe to offer course(s) for teachers in northern Louisiana. The applicant must offer courses during the summer in the traditional classroom format as well as offer online courses. Southeastern Louisiana State University will keep the cost of the courses to a minimum so that teachers can obtain the required courses for certification with little or no out-of-pocket expenses.

Management and Finance - Other

- 5.2.10 On motion of Mr. Guillot, seconded by Ms. Boffy, the Board approved the following allocation:

Allocation: USDA Team Nutrition Training Grant
Amount: \$40,860
Funding Period: 01/01/2012 - 06/30/2014
Source of Funds: Federal

Purpose: The School Food Authority from one local educational agency (LEA) agreed to work with a chef from the John Folse Culinary Institute at Nicholls State University (NSU) to create a set of cycle menus that complied with the USDA HealthierUS School Challenge (HUSC) initiative. Two LEAs agreed to submit applications for the USDA HealthierUS School Challenge award on behalf of schools in the LEAs.

Basis of Allocation: Districts were selected based on meeting criteria set forth by a USDA Team Nutrition Training Grant Proposal. Terrebonne Parish will work directly with a chef at the John Folse Culinary Institute at Nicholls State University to develop menus that meet USDA HealthierUS School Challenge (HUSC) criteria. St. Tammany Parish was selected based on the capability of the district to meet the requirements of the grant. The USDA Grant RFP required states to guarantee that at least 50 schools would submit HUSC applications. Terrebonne Parish will submit an application for the bronze level award and receive \$735 per school. St. Tammany Parish will submit an application for the Gold of Distinction award and will receive \$872 per school.

Agenda Item 4.	<u>Report by the State Superintendent of Education</u>
-------------------	---

State Superintendent of Education John White stated that the final statewide tour to discuss career education efforts and career diploma implementation will begin next week. Past tours have provided two specific lessons: (1) the stigma that is often attached to career education must be removed, and (2) if real economic opportunity is to be offered to students who are not immediately going to a four-year university, we must ensure that the career education that is provided results in credentials that allow them to continue their education and to succeed in the workplace. Specific components of Jump Start will be proposed for public discussion, including 8th graders making the transition to high school; 9th and 10th grade curriculum, 11th and 12th grade curriculum, credentials that students can achieve in that time, rewards that school systems will accrue when students succeed in career education, and how a system of technical preparation can be funded so that students can be employed in Louisiana jobs.

(Motion continues on page 8)

1. encouraging proven school operators to provide new, high-quality educational options for students in low-performing schools, and
2. providing for the training or planning period for high-potential school leaders who intend to lead a school focused on serving this student population.

Basis of Allocation: Funding will come from the federal 1003(a), Public Charter School Program and Race to the Top grants and from 8(g) New Schools Incubation. Recipients of funds submitted competitive Believe and Succeed grant proposals to the LDE and were evaluated using a rubric and determined eligible to receive funds by a review committee.

- 5.2.9 On motion of Mr. Guillot, seconded by Ms. Boffy, the Board approved the following allocation:

Allocation:	Early Childhood Programs: Louisiana Early Education Program (LEEP)
Amount:	\$110,000
Funding Period:	01/01/2014 - 9/30/2014
Source of Funds:	Federal

Purpose: This is year two of a three year grant. The purpose of the Preschool LEEP (Louisiana Early Education Program) Summer Institute is to provide certification and training opportunities for early intervention specialists and/or teachers seeking certification in early intervention. The Early Intervention (EI) certification is required for Louisiana teachers who provide services to children with developmental delays from birth through kindergarten. These EI specialists work very closely with regular education preschool teachers as well as the families to ensure the children with disabilities are provided a free appropriate public education, affording them the opportunity to develop to their fullest potential, and that this education will be provided by qualified individuals. A review of current data indicates a shortage of certified teachers in the field of early intervention/early childhood special education. Currently reported for this school year, there are approximately 574 Early Intervention (EI) teachers across the state and, of that number, there are 168 (29.3%) who are not certified in the field. There is a great need for teachers with certification to teach children with developmental delays from birth through kindergarten especially in our more rural areas. By providing funds to two university applicants, more teachers can acquire the courses required to be Early Intervention certified.

(Motion continues on page 9)

Basis of Allocation: This allocation for year two of the LEEP grant was chosen by a Competitive Request for Applications (RFAs) in FY 2012. The grant is being allocated to Southeastern Louisiana State University. This university will work with the University of Louisiana-Monroe to offer course(s) for teachers in northern Louisiana. The applicant must offer courses during the summer in the traditional classroom format as well as offer online courses. Southeastern Louisiana State University will keep the cost of the courses to a minimum so that teachers can obtain the required courses for certification with little or no out-of-pocket expenses.

- 5.2.10 On motion of Mr. Guillot, seconded by Ms. Boffy, the Board approved the following allocation:

Allocation: USDA Team Nutrition Training Grant
Amount: \$40,860
Funding Period: 01/01/2012 - 06/30/2014
Source of Funds: Federal

Purpose: The School Food Authority from one local educational agency (LEA) agreed to work with a chef from the John Folse Culinary Institute at Nicholls State University (NSU) to create a set of cycle menus that complied with the USDA HealthierUS School Challenge (HUSC) initiative. Two LEAs agreed to submit applications for the USDA HealthierUS School Challenge award on behalf of schools in the LEAs.

Basis of Allocation: Districts were selected based on meeting criteria set forth by a USDA Team Nutrition Training Grant Proposal. Terrebonne Parish will work directly with a chef at the John Folse Culinary Institute at Nicholls State University to develop menus that meet USDA HealthierUS School Challenge (HUSC) criteria. St. Tammany Parish was selected based on the capability of the district to meet the requirements of the grant. The USDA Grant RFP required states to guarantee that at least 50 schools would submit HUSC applications. Terrebonne Parish will submit an application for the bronze level award and receive \$735 per school. St. Tammany Parish will submit an application for the Gold of Distinction award and will receive \$872 per school.
